

REGULAR CITY COUNCIL MEETING
January 12, 2016

The Regular City Council Meeting was called to order by Mayor Pro Tem Couture in the Council Chambers at City Hall at 7:00 p.m.

Roll Call:

Present: Riddle, Couture, Kwiatkowski and Temple

Absent: King, Lavender and Bronson

Councilwoman Kwiatkowski moved to excuse Councilmen King and Lavender and Mayor Bronson; supported by Councilman Temple. Motion carried unanimously.

Councilwoman Riddle led the Pledge of Allegiance to the Flag.

Approval of Agenda, and Receive and File all Communications:

City Manager Eustice informed the Council that Agenda Item 6A, under Communications and Petitions, the 2014/2015 Audit Presentation, will not be presented tonight. It will be rescheduled to the January 26, 2016 City Council Meeting.

Councilwoman Riddle moved to approve the Agenda and receive and file all communications; supported by Councilwoman Kwiatkowski. Motion carried unanimously.

Approval of Prior Meeting Minutes:

▪ **Regular City Council Meeting Minutes – December 22, 2015.**

Councilman Temple moved to approve the Regular City Council Meeting Minutes of December 22, 2015 as presented; supported by Councilwoman Riddle. Motion carried unanimously.

Communications and Petitions:

▪ **Presentation by Mr. Jon Hall, Forestry Department, Consumers Energy – re: Tree Trimming** – City Manager Eustice stated there certainly have been a lot of questions about Consumers Energy's tree trimming project throughout the County, so they thought it would be a good idea to come to a City Council meeting and explain their operation and what they intend to do here, and try to answer any questions that the Council or public may have.

Mr. Jon Hall thanked the Council and introduced himself, along with Heather Butler, the local forester who will be managing the project, and Tim Petrosky, a local area manager. He provided Council with general information on Consumers Energy followed by the work they will be doing and what we can expect. Consumers Energy is a Michigan based company. They committed 250 million new dollars on Michigan suppliers in 2014 on a five-year program. This money was gone in 6 months so they kept bumping it up to one billion dollars and in July 2015 they hit that mark. They are now committed to spending five billion new dollars over the next five years, or fifteen billion new dollars over the next ten years on infrastructure projects such as better reliability, renewable energy, environmental quality and energy efficiency. Mr. Hall went on to state they invested 750 million dollars for smart meter deployment throughout the State, and are ahead of schedule on that. He stated the smart meters do not look inside a home or cause cancer. What it will do over time is enable the customer to manage the energy use within their homes and

Regular City Council Meeting – January 12, 2016

businesses much more effectively. Finally, Consumers will be spending two-hundred sixty-five million dollars on a new wind park. They have also donated eight million dollars to non-profit organizations, with employees donating over 155,000 hours of their personal time volunteering in the communities. Michigan non-profits received more than 36 million dollars in the last five years from Consumers Energy. Last year they were awarded the William Booth Award from the Salvation Army for their PeopleCare Program. Customers can send in a few dollars to Consumers Energy with their payment and that money goes to the Salvation Army to help people stay warm during the winter. They are responsible for delivering reliable electricity to 1.8 million Lower Peninsula customers in the State, while having over 60,000 miles of overhead lines to maintain. Mr. Hall went on to explain that many factors influence their delivery to do that safely and reliably, i.e. weather, exposure of equipment and trees.

Mr. Hall explained that Consumers Energy has 2,000 circuits across the State. With regard to their commitment to reducing tree-related outages and the upcoming tree trimming/removal they do the following: first send out postcards stating the planner is coming; second they like to speak with the property owner; and third they leave door cards with a contact telephone number. Before work is begun another letter is sent to the entire circuit with a brochure. He went on to state that field work is completed by line clearance qualified contractors, under the supervision of Consumer Energy Foresters; all work is inspected by Consumers Energy Foresters when complete; and all Foresters are certified in the International Society of Arboriculture. Mr. Hall then explained that their distribution lines range from 4,800 volts to 46,000 volts and the clearances vary based on the voltage of the line, construction style and species and location of the tree. He further explained that the line clearing priorities that includes achieve minimum clearance, promotion of future growth away from lines and to minimize risk to the trees' health. To promote future growth away from lines they do what is called a directional prune. Every tree that they look at, and they average about 100 per mile when doing the circuit work, they evaluate individually as to what needs to be done with it. The line clearing considerations are: species of tree (growth characteristics and growth rate); health of tree; location in relation to line; line configuration and voltage; and future maintenance requirements. He then reviewed photographs of a tree planted by a property owner that interfered with a line and the line burning a hole in the tree, with the end result being the tree being removed.

Mr. Hall then reviewed the markings on trees with blue paint. He noted an "X" means the tree is to be removed; an "O" means the tree is to be pruned; and a "/" means small trees or brush are to be removed. Also, a planner will visit with a property owner if they wish to discuss the trimming or removal plans. Mr. Hall also explained line clearing examples of deciduous trees and evergreens.

Mr. Hall reviewed the minimum clearance requirements, noting the voltage of secondary and primary lines and the related minimum clearance. He noted the distribution secondary wire is the only coated wire on their system and requires 1 to 2 feet and services the home or business. The distribution primary wire ranges from 4,800 to 14,400 volts (going down the street on the pole tops) need at least 10 feet of clearance. In undeveloped or unmaintained areas 15 feet is needed on both sides of the pole line. Mr. Hall noted another thing they are doing as part of this year's program is working outside of their right-of-way by up to 20 feet either way. If they see a tree that is dead, dying, diseased or broken that could possibly fall into their lines from outside of their right-of-way they will contact that property owner stating they would like to take that tree down

Regular City Council Meeting – January 12, 2016

because it is a danger and 99 times out of 100 the property owner says sure; thus they are addressing what they call danger trees.

Mr. Hall then reviewed their clean-up practices as follows: (1) In a maintained (mowed area/lawn) are they will chip all the brush and haul it away and will cut the wood into manageable pieces and pile it right there by the tree. Sometimes this can be a concern with a senior citizen or someone incapable of moving the wood; Consumers does not haul wood but know a lot of people that do. He noted there should be no problem getting rid of the wood. (2) In the unmaintained areas all the debris will be piled to the side of the right-of-way, which will eventually deteriorate and be a habitat for animals. (3) After storms before a line is put back up the tree will have to be removed. There are three things they will not do leave: wood on a driveway, sidewalk or street. Other than that, wood debris from storm restoration is the property owner's responsibility just like any other storm damage. Mr. Hall explained that mechanical clearing will not be done, such as side trimmers and hydro ax mowers.

He asked that property owners not plant tall growing trees near overhead lines (Right Tree, Right Place), giving examples of wrong planting. He asked that the City confidently refer property owners with questions, etc. to Consumers Energy. There is also more information and a video at www.ConsumersEnergy.com/forestry and www.arboday.org. Mr. Hall then mentioned the Oak Wilt is just as damaging as the Emerald Ash Borer, explaining Consumers cautiousness when dealing with Oak Wilt disease so as not to spread it. Councilwoman Riddle commented Indian River has a lot of Oak Wilt. Ms. Heather Butler stated the Consumers project area in Cheboygan County will cover about 50 miles. Mr. Hall noted the brochures and information he brought to this meeting. He then asked for questions.

Councilwoman Riddle asked what a safe distance is for planting a tree next to a pole, because too much brush under a pole makes it difficult. Mr. Hall stated they would like to have a safety circle of possibly 10 feet around it because sometimes there is equipment 8 to 9 feet wide that has to get to the pole. Councilwoman Riddle then inquired on the smart meters, saying Mr. Hall mentioned that the homeowners have better control over their electric use, asking if this is explained on the new bill they will receive. Mr. Hall referred her to the Consumers website and the section on the smart meter, noting that more and more information will be provided. He stated the meters are designed now for future technology in home appliances and lighting, etc.

Councilwoman Kwiatkowski asked in the more populated areas why there isn't more of a campaign to bury the wire. Mr. Hall replied their rates are designed for overhead services; underground is much more expensive. Underground lines also have a life and do fail after 30-40 years, pointing out that underground lines put in subdivisions in the 1970's now have driveways, gazebos, landscaping, etc. that now have to be removed due to the failure of the underground line. When an outage occurs in an underground wire, it is much more difficult to find. He likes to have the live wires where he can see them and avoid them.

Mr. Frank Maybank commented on trimming/pruning done over the years on his property, stating they always ask, and he wants to make sure they are not going to butcher but trim. Mr. Hall replied they are not landscapers – they are line service. They will do their best to make sure it is aesthetically pleasing as possible, but that is not the main goal. The main goal is to make sure the wires are clear and safe. Mr. George Striebich asked is someone is going to contact him before

Regular City Council Meeting – January 12, 2016

they start cutting because he has x's on all his trees. Mr. Hall told Mr. Striebich to call the number on the door hanger, because he was not home. Mr. Striebich stated he called the number but no one has contacted him, commenting he planted the spruce trees for a barrier from the road. Ms. Heather Butler stated if Mr. Striebich contacted them he will hear from them before they begin cutting. Mr. Hall told Mr. Striebich that someone will be out to see him tomorrow. Mr. Raymond Lofgren stated they probably have 2,000 to 10,000 shrubs and trees and have not been contacted, although the trees are marked. He then stated there was a door hanger. Mr. Lofgren then said there is a couple problems as the properties are owned by three different owners, of which some are based in Sarasota, Florida. The properties are on Lighthouse Lane cutting across to Duncan Shore. There is probably 1 ¼ mile of properties and is concerned. Mr. Hall stated the property owner has a chance to move a tree if they desire and use it somewhere else. Mr. Lofgren stated some areas that are vegetated over, now is a good time to cut it. Heather Butler then asked for Mr. Lofgren's telephone number to contact him.

Clarence Roznowski asked if Heather Butler is the one doing the trees within the City. She replied yes, but the number on the door hanger is for the planner. Mr. Roznowski stated he owns the Great Lakes Tissue Plant and there is a whole row of trees to be taken out along the River bank, noting they have tried calling the Consumers number but no one calls back. Mr. Roznowski stated he will talk to Ms. Butler after the meeting. Mr. Hall thanked the Council.

Mr. Tim Petrosky stated his role as Area Manager is to be a liaison between the City and Consumers Energy, noting they have met with City Manager Eustice on a couple of occasions. He stated City Manager Eustice has all his contact information if someone has a question, adding he will find an answer. City Manager Eustice thanked Mr. Hall, Ms. Butler and Mr. Petrosky.

Bills and Disbursements:

▪ Prepaid Bills and Disbursements for the Month of December 2015.

Mr. Ray Lofgren commented, with regard to the expense for Elk Run Landfill for WWTP sludge removal, he talked with DPW Director Karmol on this two months ago and also a gentleman from the DNR about receiving the sludge. He feels DPW Director Karmol should have announced Lofgren was taking the sludge for a cost of what we paid Robiadek of about \$7,000.00. They were taking the sludge to their property just out of town and it would not have cost the taxpayers a dime, let alone 21,000 and some dollars. Mr. Lofgren went on to state he was in the middle of negotiations with the DNR, and then all of a sudden the sludge that has been sitting there for probably four years is being bid out for removal in four weeks. He stated the sludge material, would have been laid in their field 8 inches thick for three to four years and then sold, after being tested, and then worked back up with their dirt, selling for \$20.00 per yard. Mr. Lofgren thought the City only paid \$7,000.00, but there was an additional \$21,413.81 paid. He does not understand why DPW Director Karmol did not say a word to Council or the City Manager regarding the Lofgren negotiation with the DNR.

Councilman Temple asked why this happened. City Manager Eustice stated the sludge needed to be moved because we were out of room. He noted this is typically done in four to five year increments but it has been almost ten years. It always costs us to take it to a landfill that takes this type of sludge, and there is always an option to sell it to the farmers, who can only take so much which requires only a certain percentage placed on the land and also requires approval from

Regular City Council Meeting – January 12, 2016

the DEQ. Mr. Lofgren commented there is a lot more sludge material over there, adding this is the second time for costly projects, mentioning the S. Huron Street repair about six months ago.

Councilwoman Riddle stated since we have more sludge and we know it costs a lot of money to move the other, we now can be proactive in doing it in a fashion that would not cost the taxpayers more money. We need to address a good way of doing the removal that does not cost the taxpayers. Mayor Pro Tem Couture commented it sounds like there has been some discussions with DPW Director Karmol on this. City Manager Eustice stated he really was not aware that Mr. Lofgren was still working on that. Mr. Lofgren commented he disagrees with City Manager Eustice because if there was any conversation the book was closed real quickly because they were in the middle of the DNR negotiation. City Manager Eustice asked if it was then still a possibility. Mr. Lofgren replied absolutely. Mayor Pro Tem Couture then requested that this be reopened to find out. City Manager Eustice stated he will have DPW Director Karmol attend the next meeting to explain his position as to why it went this way. Councilwoman Riddle stated since there will be more material, to address it more appropriately in the future would probably be a good thing.

Councilwoman Riddle moved to approve the prepaid bills and disbursements for the month of December 2015 in the amount of \$540,146.77; supported by Councilman Temple. A roll call vote was taken; motion carried unanimously.

▪ **Unpaid Bills and Disbursements for the Month of December 2015.**

Mrs. Trudy Lofgren inquired on the \$2,000.00 expense to Dixon Engineering for the water tower inspection, asking what the results were and if everything is okay. Clerk/Treasurer Kwiatkowski replied he got the billing on this a couple weeks ago and assumes DPW Director Karmol has received some type of report. City Manager Eustice stated it was both an interior and exterior inspection and the interior was okay, which is certainly the most critical part of the tower, noting the exterior of the tower needs to be painted, which they will look at painting this summer.

Councilwoman Riddle moved to approve the unpaid bills and disbursements for the month of December 2015 in the amount of \$25,576.87; supported by Councilwoman Kwiatkowski. A roll call vote was taken; motion carried unanimously.

Department, Board and Commission Reports:

▪ **Planning Commission Meeting, December 21, 2015** – City Manager Eustice commented there is a Planning Commission meeting on Monday, January 18, which should finalize their review of the new Zoning Ordinance; however, there stills needs to be a meeting with Mr. Dick Carlisle of Carlisle Wortman. He is hopeful of getting this to Council sometime in February. The finishing of the City's Master Plan will then follow. City Manager Eustice then stated the Commission did vote to change the meeting time from 6:00 p.m. to 7:00 p.m. on the third Monday of each month.

General Business:

▪ **Consideration of Resolution (Michigan Department of Licensing and Regulatory Affairs, Liquor Control Commission) for a New Small Distiller License at 100 N. Main Street – LMV, LLC** - City Manager Eustice commented this is the former Kentucky Fried Chicken building and this Resolution is basically local government approval for LMV, LLC to be able to

Regular City Council Meeting – January 12, 2016

apply for small distiller liquor license. This license, which is a little more strict, will give them the ability to distill liquors. City Manager Eustice then informed Council and Clarence and Robin Roznowski are in attendance to answer any questions.

Mr. Clarence Roznowski stated he thinks Cheboygan needs some attraction and reason to come to Cheboygan, adding he thinks the Brewery was a great addition, and thinks the next thing that is very, very common and growing quickly is distilleries. They are not talking about an industrial site, but what he calls a boutique distillery. They are talking about making liquors that are very, very specialized in extremely small batches of 5 to 10 gallons at a time and running a number of stills simultaneously. It would be similar to a fudge shop where you actually see them making the fudge in the front window and selling it there. They are not going into national production; it will look more like a science class lab rather than an industrial facility. The process of doing this is not short and not easy. It starts with the State licensing that includes the Council knowing about it and are in agreement with it; Federal licensing; incredibly taxed and overseen; and inspections from a number of government agencies. Mr. Roznowski noted this will take a significant amount of time. After they get through phase one and they get approval to go forward with it, they have to completely change the building around and make it extremely modern. It will be a nice centerpiece for the community. It will not be done this summer, but are hoping to get the licensing this summer, and start the Federal licensing. It may be as much as three years to get the process and equipment together, architecture together, and all licenses. Mr. Roznowski went on to state they acquired the building about two months ago and this is the current plan of what to do with it. If it doesn't work out they will go to plan "B", but do not know what that is yet. He feels this use would be a good fit for the community in that area.

Councilwoman Riddle asked if the changes in the footprint for the building will begin this year. Mr. Roznowski stated he does not think the footprint will change at all, but noted changes to the façade, siding and windows. He stated it does have facilities on site for storage. Clerk/Treasurer Kwiatkowski asked what the distribution system is for those types of items. Mr. Roznowski stated they are talking about a micro-facility – all will be sold on it, no distribution. There will also be a tasting room on site. Councilwoman Kwiatkowski asked if there will be a bottling line or the growler type. Mr. Roznowski replied it will be a bottling type and the operation will be very small. City Manager Eustice asked if tours of the facility are still in the plan. Mr. Roznowski replied yes. City Manager Eustice then asked if their plan is only to distill rum. Mr. Roznowski replied no, they will be making just about everything they can make, noting rum is the easiest liquor to distill as they can use all Michigan ingredients and focus on using sugar beets, adding it will be a 100% Michigan made rum.

Councilwoman Kwiatkowski moved to recommend the Application by LWV, LLC for a New Small Distiller License at 100 N. Main Street; supported by Councilman Temple. A roll call vote was taken; motion carried unanimously.

Public Comments:

Mr. Ray Lofgren stated he would like to address Council about the sludge removal, unless they want to do it at a different time. Mayor Pro Tem Couture stated he definitely would like to hear more about what is going on, but would like to have DPW Director Karmol explain it, noting Mr., Lofgren's input is definitely desired. Mr. Lofgren stated he will be short, going on to state he is sure the DPW probably has a lot of work load. He believes the taxpayers are paying the brunt of

Regular City Council Meeting – January 12, 2016

work that is going out and some of it is unnecessary. He stated his process with the DNR for this particular sludge begins with a visit to the site, etc. He believes he was told that 2,000 yards at the north end was removed and there remains two-thirds or three-quarters more to haul. He opened the door because Mr. Bryan Lofgren said he didn't have time to talk to DPW Director Karmol and a Mr. Wilson, he believes, from the DNR, so he made two contacts. Then he needed to talk to DPW Director Karmol again, which he did. Three weeks later the sludge was gone. Nothing was said to him or Bryan Lofgren. Mr. Lofgren commented he thinks there is a lot of this going on that the Council is not aware of. City Manager Eustice reiterated that he will have DPW Director Karmol attend the next Council meeting to address this issue. Councilwoman Riddle stated it is always a good thing to reuse the material, noting the reuse of the sawdust pile. It is a process where you have to aware and plan for it, but it's something that can be done. Mayor Pro Tem Couture stated it is his hope there are valid reasons, but we will figure it out.

City Clerk/Treasurer's Comments:

- **Audit Presentation** – Clerk/Treasurer Kwiatkowski stated the Audit Presentation is scheduled for the next City Council meeting
- **2016 Elections** – Clerk/Treasurer Kwiatkowski commented there are four elections this year – March Presidential Primary, May School Election, August Primary, and November General, including the Presidential and City Council. He noted there will be three Council seats open and the Mayor's seat. He will get the deadline for turning in nominating petitions to Council. Clerk/Treasurer Kwiatkowski went on to state at the State level legislation was passed that if you have a local item on the ballot, 60 days out from the election to the day of the election there may be somewhat of a gag order on all public officials. They are sorting this out in Lansing now, but as of right now if we had a project that we wanted to place on the ballot, due to a bond, from two months before the election up to the election we would not be able to speak to anyone about it or provide information. Originally it was that you could not spend public monies, i.e. mass mailings, ads in the paper, etc., but with the new law you cannot even talk about it. Clerk/Treasurer Kwiatkowski informed Council he will keep them informed on this issue.

City Manager's Report:

- **Streetscape Lights & Pedestrian Footbridge** – City Manager Eustice reported that Consumers Energy got the streetscape lights back on, which were out due to the Consumers pole that caught on fire in Washington Park for the third time. The power was rerouted away from the pole. There still is no power to the pedestrian footbridge or the elevators. Consumers Energy engineers are working on how to correct the pole issue. On August 2, when we had a lot of damage throughout the City from a wind storm, at which time the pole caught on fire, in addition to early Christmas Eve. There is something wrong with their power source and until they get their engineering to figure out what that is, they are not repairing it. It is down right now and may be down for several more weeks, and have even told him it may not be repaired until spring because the power that runs to the footbridge is underground and believe that entire wire is burnt. Councilman Temple asked if the bridge is shut down for the winter. City Manager Eustice replied it is not, although it is not handicap accessible but you can walk across it. The State says if there is an outage like that we can still allow pedestrians to go across it. We could not purposely shut it down. He added unfortunately due to the power outage on Christmas Eve several stores were not able to sell what they normally would sell and could not use credit card machines, although some stores stayed open. He noted there are no overhead lights at the intersection because of the streetscape project, so that portion of downtown was very dark.

Regular City Council Meeting – January 12, 2016

- **Festival Square Ice Rink** - City Manager Eustice announced that the Parks & Recreation Department are building an ice rink in Festival Square. It probably will not be usable until early next Monday.
- **Utility Committee Meeting/Projects** - City Manager Eustice informed Council that last week a Utility Committee Meeting was held, noting Councilman Temple attended in place in Councilwoman Kwiatkowski who was not able to be there, as well as Councilwoman Riddle. They went through a lot of projects in the five-year and ten-year plans in the Water Reliability Study and over that ten years we have close to 8 million dollars of improvements that are recommended by the Study and the DEQ. Part of this is the water tower, at nearly 2 million dollars. We will try and get funding for a new tower from the USDA this year, with the actual project not occurring until 2017. We need the capacity if we are going to grow and add businesses, especially manufacturing businesses. The DEQ says we need at least 600,000 gallons above ground and we currently only have 500,000 gallons, and recommended a 300,000 gallon tank. City Manager Eustice stated they are looking at putting up a 500,000 gallon tank. The Committee will meet again in February with the USDA (Blake Smith) and DEQ (Brian Thurston) and discuss all of the funding options and what we need to do.
- **Port Purchase Agreement** - City Manager Eustice stated the City's Attorney for the Port Project, Steven Joppich, did respond to Bois Blanc Township in regards to their Purchase Agreement. Mr. Joppich did edit it and took out what we considered to be unacceptable contingencies in the Agreement. The attorney for Bois Blanc Township does have this from Mr. Joppich and we have not heard anything yet. City Manager Eustice went on to state he is going to ask Mr. Joppich to contact the attorney for Bois Blanc Township, Mr. Cliff Bloom, and set a timeline. He went on to state that Mayor Bronson, Councilman Lavender and himself met with Ryba last Monday, January 4, informing Council that Ryba has an offer in on some of the same property that the Township is interested in and Ryba would like an answer at some point. They do not want to wait until spring. City Manager Eustice stated he thinks the City owes Ryba an answer pretty soon, noting Ryba was going to bring a couple barges back here, but because of the weather they were not able to do that. Ryba would like to buy property both for storage and future development. Mayor Pro Tem Couture gave his personal opinion that as soon as we hear anything from the Township that a closed session Council meeting be held, with all members present, so that we can talk about this openly and find the direction that we really want to go and start to keep moving forward. City Manager Eustice stated the meeting cannot be in closed session. Closed session meetings can be held for land acquisitions, but as far as the sale of property any discussion has to be held in an open meeting. Councilman Temple stated we really need to get a time limit on this. City Manager Eustice reported that Kokosing/Durocher Marine is going to make an offer on property on the north end that will probably come in by the end of this week. Mayor Pro Tem Couture commented there is other interest, too. City Manager Eustice replied the U.S. Fish & Wildlife would like to buy 160 feet this year. Mayor Pro Tem Couture stated the City should plan to meet with the U.S. Fish & Wildlife, as well, unless we know all the details of what they are looking for, to have this information available for full Council discussion so we can put together a plan and go with it. City Manager Eustice commented a lot has changed since we owned the property. Mayor Pro Tem Couture stated it was hard for anybody to be interested in it until they knew it is available.

Mr. Ray Lofgren commented the U.S. Fish & Wildlife occupies City property. Ryba is operating on City property. If Durocher wants property, what is left of the Port.? He then asked if revenue

Regular City Council Meeting – January 12, 2016

is coming into the taxpayers from the U.S. Fish & Wildlife and Ryba. Mayor Pro Tem Couture commented these are all valid pieces of information.

Messages and Communications from Mayor Pro Tem and Council Members:

▪ **Sidewalk Clearing – W. Lincoln Avenue** – Mayor Pro Tem Couture stated he drives school bus every day and does not know what the rules are for sidewalk clearing. The sidewalk that goes to the middle school and high school areas is not passable and does not know whose responsibility it is. If it is not the responsibility of the property owners, he truly thinks the City should clear it, as he feels it is not safe to walk on the street. Councilman Temple commented the City clears from State Street, down “F” Street to East Side School, so we should be clearing the sidewalk to the high school. Councilwoman Riddle asked if the John Deere used to clean sidewalks is used at its maximum. City Manager Eustice replied probably not and the DPW is going to try and get a tractor into the hands of the Parks & Recreation Department to clear sidewalks. The Parks & Recreation Department right now clears most of the sidewalks with hand snow blowers. Mayor Pro Tem Couture stated the Lincoln Avenue sidewalk clearing needs to be pretty high on the priority list. City Manager Eustice informed Council he will look into this.

Adjournment:

Councilman Temple moved to adjourn the meeting at 8:24 p.m.; supported by Councilwoman Kwiatkowski. Motion carried unanimously.

Mayor Mark C. Bronson

Clerk/Treasurer Kenneth J. Kwiatkowski

Councilman Joseph Lavender

Councilwoman Winifred L. Riddle

Councilman Vaughn Temple

Councilman Nathan H. King

Mayor Pro Tem Nicholas C. Couture

Councilwoman Betty A. Kwiatkowski
