WATCH OUT FOR SNOWPLOW TRUCKS

While driving along City streets this winter, please be extra cautious when encountered by snowplow trucks during the course of their snow clearing activities. Be sure not to follow or park too close behind a plow truck in operation, as they often are required to back up. Operators have difficulty seeing what may be directly behind the vehicle. Parents should be aware that during winter storm events, which cause school closings, snowplows are busy clearing streets and opening them to traffic as quickly as possible after the storm. Due to school closings, many children are out & about entertaining themselves and enjoying a day off from school.

Parents should be aware of the snow plowing activities and be sure children are kept away from streets and roadsides. Also, please do not allow your children to build snow forts near the streets.

City Considers Additional Water System Improvements

Under the Water Quality Objective of the Strategic Plan, the City continues to look at additional water system improvements. The City has completed a 1.1 million dollar water system improvement in 2007. The water system upgrade in the downtown area is planned for 2009 in conjunction with the Michigan Department of Transportation's planned rebuild of Main Street. The City is also considering a 2010 water system improvement project. Under consideration is replacement of additional water mains based on staff and customer input. The scope of the project under consideration for 2010 is estimated at a total of 3.7 million dollars which includes water main replacement and a new 3000 gallon elevated water storage tank to be located on the southeast side of town. Financing under consideration includes a 40 year federal loan. Also an increase in water rates would be required in order to service the loan debt. Evaluation of the proposed 2010 project will continue. It is important that water system

customers continue to provide City staff with information relative to water quality. Complaints and comments relative to water quality can be directed to the City Hall staff at 627-9931 who will record relative information. Water system staff will then conduct follow-up.

RENTAL PROPERTY

Owners of rental properties are reminded to notify the Utility Billing Dept. at 627-3592 whenever there is a change in tenants. A meter read needs to be done in order to calculate a “final bill”. the owner’s name. Deposit money is kept in a separate account to be used on the final bill or returned if nothing is owed.

INSPECT YOUR MAILBOX

Winter is here. Have
you inspected the condi-
tion of your mailbox and
post it is mounted on?
Boxes eventually become
loose and/or rusted and
are easily displaced from
snow being thrown. Even
wolmanized posts can
become soft and rot.

Check your post for
knots. Impact near a knot
will split a post easily.
Keep the area around your
mailbox clear of snow.
Remove decorative,
oversized and plastic
mailboxes during the
snow removal season.

*These types of mailboxes do
not tolerate impact from snow
and will not be replaced in
kind.*

If a City of Cheboygan
DPW snow plow truck
hits and destroys a mail-
box, the City will provide
a new standard mailbox.
However, if a mailbox is
damaged by snow being
pushed or thrown, and not
by the truck itself, the
City of Cheboygan will
not replace the mailbox.

If you have any
questions or concerns,
please contact David
LaCross, DPW
Superintendent at 627-
2493 (7am to 3:30 pm
Monday-Friday).

WATER SHUT-OFF INFORMATION

Any customer who has
their water service shut
off and has to have the
City Water Department
restore service, will be
charged a \$40.00 **Turn
On Fee.** This will
include seasonal
customers, non-
payment customers
and anyone
discontinuing service
for a period of 30 days
or more.

“Let Water Run and Water Service Freezing Policy”

The City of Cheboygan shall allow a “Let Water Run Credit” for those water/sewer customers who properly notify the City that they will be running their water over the winter months to avoid freeze-ups of their water service. **Proper notification shall be in writing to the water/sewer billing department.** The City shall keep a record of the yearly lists subject to the City’s “Records Retention Policy.”

In the event that a customer experiences a freeze-up of service that must be thawed by the City, the customer shall then notify the water/sewer billing department, in writing, that they will let their water run to avoid future freeze-ups. The City water/sewer department will then add the customer to the City “Let Water Run List”.

If the water service freezes between the water main and the “curb stop” or outside the water meter pit, the City shall correct the situation at its sole expense. If the meter freezes, the City shall thaw the service one time, any subsequent thawing shall be at a rate of \$40.00 per occasion and added to the customer’s next water/sewer billing. If water service freezes on the building side of the “curb stop” or outside the meter pit, the City will have no responsibility in the matter. The City may assist on a labor, equipment, material and overhead basis if the customer agrees to pay the total expense.

The water/sewer billing clerk shall issue a “Let Water Run Credit” for all customers on the City “Let Water Run List” on the next billing that is based on an **actual reading** of the customer’s water meter. The amount of the credit will be based on the **previous year actual meter read** billed amount.

The City of Cheboygan reserves the right at any time, to modify, revise, amend, terminate or otherwise change the City’s Let Water Run and Water Service Freezing Policy.

SNOW & ICE REMOVAL FROM SIDEWALK REQUIRED

The owners of any property in certain areas are required by City Ordinance to keep sidewalks clear of snow and ice. The areas which are included in the snow & ice removal Ordinance are listed as follows:

- Huron Street from Mackinaw Avenue to Locust Street
- Main Street from First Street to the South City Limits
- Water Street from State Street to Elm Street
- Mackinaw Avenue from Clinton Street to Main Street
- State Street from Huron Street to “F” Street
- Backus Street from Huron Street to Main Street
- Division Street from Dresser Street to Water Street
- Elm Street from Huron Street to Water Street
- Pine Street from Huron Street to Main Street
- Locust Street from Huron Street to Main Street

These sidewalks have been identified as high foot traffic areas and, as such, removal of snow & ice is required by Ordinance in order to insure public safety and limit property owner and public liability. The City of Cheboygan does provide snow removal services within this area, but this does not dismiss the requirement of the property owner to be sure that the sidewalk is clear in the event that the City is unable to keep the sidewalks clear in a timely manner.

The snow & ice removal Ordinance provides for fines in the event a property owner is in non-compliance and also provides for exceptions to these provisions with regards to property which is leased. DO NOT PILE SNOW IN RIGHT-OF-WAY, ON SIDEWALKS OR IN BERM AREA (BETWEEN CURB & SIDEWALK).

For more information regarding the snow & ice removal Ordinance, you may call the Department of Public Safety at 627-4321, visit the City of Cheboygan’s web site or stop at City Hall to obtain a copy of the Ordinance.

City Conducts Planning with Local Government Neighbors

The City of Cheboygan continues to participate in intergovernmental discussions and meetings. Currently officials from the City along with officials from Beaugrand, Benton and Inverness Townships, and Cheboygan County are completing land use studies and study different methods of intergovernmental cooperation. Members of the City’s Planning Commission are involved with the NCCIPC. There is currently a vacancy on the Planning Commission. If you are interested in serving on the City of Cheboygan Planning Commission or would like more information about the Commission, please contact Scott E. McNeil, City Manager at 627-9931 or via e-mail at cityhall@nmo.net.

INFORMATION ON WHY YOUR WATER MAY SMELL LIKE ROTTEN EGGS

Hot water problems usually bring complaints of smelling like rotten eggs. The rotten egg odor is caused by hydrogen sulfide (H₂S) gas. Although the odor caused by the gas is disgusting it is not usually harmful at the low concentrations that are common in a household water system. Although modern steel water heaters are glass-lined to prevent corrosion. The creation of hydrogen sulfide gas can occur in water heaters. A long rod, or anode, is used to prevent such corrosion in water heaters and protects the steel, but it is usually made of magnesium* and corrodes more easily than the steel. The steel in the water heater will not corrode as long as the magnesium rod remains in place; however, if corrosion occurs it will free electrons that provide a protective film over cracks in the water heater. Magnesium is used often for water heaters because of the cost. You can contact a water heater dealer regarding a replacement rod that would provide protection without resulting in the sulfate-reduction reaction that causes the H₂S gas. *Your water heater may have an aluminum alloy rod. Your best bet is to contact a plumber to assist you and answer any questions you may have.
